

Jack

**THE SMART STEAM FOAMER
USED AS AN INDEPENDENT UNIT**

Perfect Moose is the smart, automated foamer which takes over for the busy barista, rescues the untrained and gives your customers a true treat worth coming back for. Using any milk type you like.

Your extra pair of barista hands.

Perfect Moose comes in 2 models: Greg & Jack

A. Touch display

Touch display guiding you through every step of the steaming process. No room for error.

B. Steam wand

Autonomously moving cool touch steam wand, releasing the right amount of steam at the right time in the right angle.

C. Nozzle

PEEK nozzle developed not to suck up any milk and positioned exactly right to create the swirling movement in the milk.

D. Temperature sensor

'Moose eye' monitoring the exact temperature of the chosen liquid during the whole steaming cycle.

E. Pitcher holder

Holder with integrated weighing scale measuring the exact amount of liquid. Underneath, the RFID reader processing information exchanged with smart moose pitchers.

F. Hoofs

Anti skid, non marking hoofs.

JACK

Perfect Moose Jack is the smart steam foamer equipped with its own boiler at the back. This solitary moose works completely independently and can be combined with all types of bar set-ups.

Perfect Moose always works in combination with smart moose pitchers. **Texture and temperature** of the microfoam can be adjusted on each smart pitcher. Set it once and all steaming cycles of that pitcher will be consistent. Unless you change your mind of course, then you simply adjust it to your liking and business needs.

Looking for a connected solution?

Check out Perfect Moose Greg, the smart foamer connected directly to your espressomachine.
